

Mathematical Sciences

Open University in Scotland

Content

Step into the world of mathematics with this diploma, where theory meets real-world application. You'll develop a deep understanding of pure and applied mathematics, with the option to include statistics, while honing problem-solving, modelling, and computational skills. By developing an understanding of mathematical software and learning to communicate complex arguments clearly, you'll be ready to tackle a range of challenges in research, finance, technology, and data-driven roles. This qualification also provides a strong foundation for further academic study in mathematics or related fields.

Start Date

October, February

Qualification

DipHE

Study Method

Online learning

Course Length

Flexible

Faculty

General

Department

Mathematics and Statistics

Entry Requirements

There are no formal entry requirements to study this qualification, but it is very important that you are well prepared to study mathematics at this level.

Computer and internet access required.

SCQF Level

8
