

## Chemical Engineering

University of the West of Scotland

### Venues

Paisley Campus

### Content

This programme is designed to deepen and widen your knowledge and understanding of chemical and process engineering specialist topics. It offers a wide range of core modules that advance the core knowledge base of the discipline and provide the necessary and continuing development of appropriate interpersonal and transferable skills at a level that a Chemical/Process Engineer would be expected to have, allowing you to function in an advanced engineering environment as senior engineers and managers. While the main focus of the programme is on taught modules, you will have the opportunity to explore a specific subject in more details through the MSc dissertation module.

You can exit after 9 months with a PgDip Chemical Engineering.

### Start Date

September, January

### Qualification

Postgraduate Master's

### Study Method

Full time

### Award Title

MSc

### Course Length

1 year

### Faculty

School of Computing, Engineering and Physical Science

### Department

Engineering

### Entry Requirements

You should possess a good second class Honours degree or equivalent qualification, in chemical engineering or related area from a recognised institution.

Other qualifications with appropriate professional or industrial experience will also be considered.

## SCQF Level

11
