

## Civil Engineering

University of the West of Scotland

### Venues

Paisley Campus

### Content

The technical MSc Civil Engineering provides you with the advanced knowledge and skills for supporting the delivery of infrastructure projects whilst minimising the impact on the natural environment. You will advance your knowledge to support your career progression within consulting and contracting organisations whilst satisfying the learning requirements for Chartered Engineer (CEng) status.

Civil Engineering, as a discipline, involves the design, construction, and maintenance of the built environment, including infrastructure projects such as roads, bridges, dams, airports, sewerage systems, pipelines, and railways.

This master's satisfies the technical and managerial expectations required by civil engineering employers as our course will develop the skills needed to interface with functional users, other than engineers, giving you a more holistic view of the processes behind successfully delivering a civil engineering project.

You can exit after 9 months with PgDip Civil Engineering

### Start Date

September, January

### Qualification

Postgraduate Master's

### Study Method

Full time

### Award Title

MSc

### Course Length

1 year

### Faculty

School of Computing, Engineering and Physical Science

### Department

Engineering

## Entry Requirements

You should possess at least a second class Honours degree or equivalent qualification in civil engineering or similar area from a recognised institution.

## SCQF Level

11

## Address

Paisley  
Renfrewshire  
PA1 2BE
