

Integrated Pollution Prevention and Control

University of Strathclyde

Content

This one-year MRes aims to provide advanced study in Integrated Pollution Prevention & Control within Europe and globally. You'll have access to laboratory facilities that provide hands-on experience essential for experimental analysis.

The course is ideal for you if you're looking for an alternative to an MSc, are interested in carrying out shorter research projects or if you wish to tailor your studies to suit your own research interests and career objectives.

This degree combines a number of subjects including: climate change; sustainability; circular economy; air pollution; human health; environmental impact assessment (EIA); strategic environmental assessment (SEA).

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MRes

Course Length

12 months

Faculty
