

Supply Chain and Logistics Management

University of Strathclyde

Content

Supply chain management is a critical business competency. It encompasses procurement of materials, processing and distribution of products and services to customers.

In many companies, 80% or more of their turnover is spent outside the organisation. This course helps you become effective in managing this. It's designed for those who will work within supply chain management. It's also suitable for anyone with a background in support functions such as sales, maintenance, finance and marketing.

This course will cover the latest logistics requirements, for example: the ability from logistics managers to enhance business opportunities to circular economy approaches and digital manufacturing; and the rise of sales through ecommerce also requires accurate demand and supply forecast from logistics area.

You can exit at the end of 21 months with a PgDip Supply Chain and Logistics Management.

Start Date

January, September

Qualification

Postgraduate Master's

Study Method

Part time (day)
