

Advanced Chemical Engineering

University of Edinburgh

Venues

King's Buildings Campus

Content

This one-year programme at the University of Edinburgh will immerse you in the most current developments in chemical engineering, through a combination of taught modules, workshops, a research dissertation, and a number of supporting activities delivered by the key experts in the field.

The MSc programme will develop from fundamental topics (including modern approaches to understanding properties of the systems on a molecular scale and advanced numerical methods) to actual industrial processes, with a particular emphasis on energy efficiency, to the summer MSc dissertation projects where the acquired skills in various areas are put into practice, to be applied to actual chemical engineering problems.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

1 year

Faculty

College of Science and Engineering

Department

Engineering

Entry Requirements

A UK 2:1 degree, or its international equivalent, in Chemical Engineering or closely related field.

SCQF Level

11
