

Bioarchaeological Science

University of Aberdeen

Venues

Foresterhill Campus

Content

Bioarchaeological Science is at the forefront of the scientific study of the human past. This new programme incorporates the study of human osteoarchaeology and palaeopathology along with the advanced study of human remains through genetic and isotopic analysis. You will learn the latest scientific techniques for the extraction, analysis and presentation of DNA, protein, stable isotope and lipid data.

Through a series of lectures, seminars and practical workshops, you will learn how biomolecular evidence is preserved and later extracted and analysed by bioarchaeologists, and how this data is used to further enhance the information available to archaeologists, evolutionary biologists and palaeoecologists.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Faculty

Physical Science

Department

Geosciences

Entry Requirements

2:1 (upper second class) UK Honours degree, or an Honours degree from a non-UK institution which is judged by the

University to be of equivalent worth in Archaeology, Anthropology, Earth Sciences, Genetics, History, or Zoology or a related discipline.

2:2 in Archaeology or a related discipline, with relevant professional experience.

SCQF Level

11
