

Rural Surveying and Rural Property Management

University of Aberdeen

Venues

Old Aberdeen Campus

Content

This programme provides a range of knowledge and skills e.g. land management, public policy, law, planning, economics, and valuation, integrated to meet the future challenges facing landowners and land managers.

Understanding of traditional land management (agriculture, forestry, sporting) and emerging and topical issues (environmental and conservation activities, tourism projects, planning issues, countryside access, diversification projects, steading conversions and renewable energy initiatives) is combined with an understanding of the business skills necessary for successful decision-making and rural business management.

As a rural land and business manager the student/graduate is concerned not only with practical land management but also with the financial, legal, planning, and policy contexts within which decisions are made and business interests managed.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MLE
