

Mechanical Engineering

Edinburgh College

Venues

Midlothian Campus

Content

You will learn a range of modules including Thermofluids and Engineering Principles. These will be taught at a high level allowing you to develop transferable skills which are essential for your future engineering career.

This course combines engineering techniques with hands-on learning. You will learn the skills required to solve mechanical engineering problems in a wide variety of industries such as; traditional energy, renewable energy, manufacturing, transport and materials.

The course is taught by teachers with industry experience using the latest industry technologies. You will be taught between Edinburgh College classrooms and workshops where you will gain essential and hands-on experience of the engineering sector. This course is intended to meet the requirements of employers and universities.

Start Date

August

Qualification

HND

Study Method

Full time

Course Length

2 years

Department

Engineering

Entry Requirements

Higher Maths and Physics or another science or technological subject; or NC Engineering Systems; or other relevant national qualifications at SCQF Level 6

SCQF Level

8
