Construction Management

City of Glasgow College

Venues

City Campus

Content

This stimulating, learner-focused programme is delivered by highly professional teaching staff with significant construction industry experience and a proven track record of bringing out the best in their students.

Construction Managers (also known as Project Managers, Site Managers and Site Agents) supervise and direct operations on a construction project to make sure it is completed safely, on time and within budget. To do this well, a Construction Manager needs to be good at organising and planning; motivating and managing people and creatively solving problems.

The HND in Construction Management is a technician level qualification that combines a broad-based construction industry specific first-year curriculum with a more specialist second-year curriculum, teaching you the skills you need for employment in this highly demanding sector.

Start Date

August

Qualification
