Agriculture

Scotland`s Rural College (SRUC)

Venues

Aberdeen Campus
Barony Campus
Edinburgh Campus
Oatridge Campus

Content

Throughout the course you'll develop an overview of the agricultural systems involved with the production of food and the agricultural supply industry.

You'll learn about livestock and crops as well as farm buildings and machinery.

You'll also gain an understanding of the way agriculture relates to animal welfare, environmental and conservation issues.

This two year course will equip you with the skills and knowledge to pursue a career at a supervisory/junior management level within agricultural industries, or for self-employment in farming or other land-based sectors.

Content includes: Livestock management systems; Crops production management; Principles of Agribusienss management; Professional development; Integrating trees on farm.
