

Computing and IT and Business

Open University in Scotland

Content

This degree brings together computing & IT with business, two disciplines that shape today's workplaces. You'll divide your time equally between both strands, gaining technical expertise in computing alongside insight into markets, organisations, strategy and decision-making. As you progress, you'll choose a computing pathway to match your interests and apply your learning through a project in a business context. On completion, you'll be ready to contribute to or lead technology projects in a variety of businesses.

Start Date

October, February, April

Qualification

Degree

Progression Routes

On successful completion of the required number and type of modules you will be awarded a Bachelor of Science (Honours) Computing and IT degree. Depending on which modules you choose the Computing and IT degree may help you to obtain professional recognition from BCS – the Chartered Institute for IT, or from the Institution of Engineering and Technology (IET). Both are professional bodies established by royal charter.
