

Computing and IT and Psychology

Open University in Scotland

Content

This degree equips you with both technical computing skills and psychological insights, preparing you for roles that bridge technology and human behaviour. You'll study core computing modules alongside psychology topics such as human-computer interaction and online behaviour. As you progress, you'll choose a computing focus and apply your learning through a project that integrates both disciplines. On completion, you'll be well-prepared for careers in areas like UX design, digital health, AI ethics, and tech policy.

Start Date

October, February, April

Qualification

Degree

Study Method

Online learning

Award Title

BSc Hons

Course Length

Flexible

Progression Routes

On successful completion of the required number and type of modules you will be awarded a Bachelor of Science (Honours) Computing and IT degree. Depending on which modules you choose the Computing and IT degree may help you to obtain professional recognition from BCS – the Chartered Institute for IT, or from the Institution of Engineering and Technology (IET). Both are professional bodies established by royal charter.
