Computing and IT and Statistics

Open University in Scotland

Content

This is one of several subject combinations available in our BSc (Honours) Computing & IT and a second subject (Q67). Computing & IT studied with statistics can open career opportunities in various sectors. You'll gain a good grounding in statistical methods, complementing the computing & IT skills you'll develop. So if you enjoy computing & IT, and statistics, these qualifications could suit you well. With an increased emphasis on data and mathematical modelling in recent years, most employment opportunities in statistics require computing & IT skills. Consequently, graduates with analytical and computing skills are highly sought-after by employers – they can have an advantage over applicants with just one of these skill sets.

Start Date

October, February, April

Progression Routes

On successful completion of the required number and type of modules you will be awarded a Bachelor of Science (Honours) Computing and IT degree. Depending on which modules you choose the Computing and IT degree may help you to obtain professional recognition from BCS – the Chartered Institute for IT, or from the Institution of Engineering and Technology (IET). Both are professional bodies established by royal charter.
