

Education Studies (Primary)

Open University in Scotland

Content

If you're passionate about children's learning and considering a career as a primary school teacher or within education, this practice-focused diploma will help you take the next step. You'll deepen your understanding of policy and practice in the evolving education landscape and develop knowledge and skills needed to work collaboratively and equitably across settings. It provides a sound foundation for progression and is relevant to a wide range of roles within the sector. Whether you're already working or volunteering in education or just starting out, you'll gain the expertise needed to make a lasting difference and inspire the next generation.

Start Date

October

Qualification

DipHE

Study Method

Online learning

Course Length

Flexible

Faculty

General

Department

Education, Childhood, Youth and Sport

Entry Requirements

There are no formal entry requirements to study this degree. Computer and internet access necessary.

You do not need to be volunteering or employed in a primary school in order to study this qualification. However, if you're not working in a school on a regular basis you are advised to negotiate opportunities to spend some time in a formal educational setting for children aged 3-12 (this can be in a voluntary capacity) to observe teaching and learning, and gain exposure to a practice context. We suggest that you try to spend between two and 10 days in school when studying E103 and E209. If you cannot spend time in practice settings, the study materials provide examples of children's learning across a range of phases and contexts. For the optional module Listening to young children: critical reflections (E229), you will have to arrange access to a young child for a short observation. See the module description for more details.
