

Geography and Environmental Science

Open University in Scotland

Content

By combining the study of geography and environmental science, you'll discover the complexities of our relationship with the natural environment. This qualification will enable you to understand and consider responses to the urgent challenges of climate change, globalisation, development, biodiversity loss, migration and urbanisation. It takes a holistic approach to topics such as deforestation, sustainable water-resource management, pollution control, conservation and governance.

Start Date

October, February

Qualification

Degree

Study Method

Distance and Flexible learning

Award Title

BSc Hons

Course Length

Flexible

Faculty

General

Department

Environment

Entry Requirements

No formal entry requirements, but if you are new to study or to the OU, we recommend that you start with a course at Level 1.

Computer and internet access required.

SCQF Level

10

Progression Routes

Science graduates are well placed to enter a range of both scientific and non-scientific jobs. The study of the sciences develops good analytical and reasoning skills, and you will also have become proficient in using computers. Skills such as these are sought by a wide range of financial, business and public sector employers, so science graduates – particularly those who have good communication and interpersonal skills – are in demand. Two of the compulsory courses are residential/practical courses which allow you to develop the practical skills required for a job in the environmental science field.
