

Computing and IT and Statistics

Open University in Scotland

Content

This is one of several subject combinations available in the Certificate of Higher Education in Computing & IT and a second subject (T13) – you'll divide your time equally between the two subjects. You will be introduced to probability and the most common methods of statistical data analysis, and you will explore the profound technological, economic, political and ethical change driven by digital technologies. With basic competence in statistics and computing skills, you will be prepared for further study to equip you to work in organisations that base decisions on statistical analysis or seek to interpret "big data".

Start Date

October, February, April

Qualification

CertHE

Study Method

Distance and Flexible learning

Course Length

Flexible

Faculty

General

Department

Mathematics

Entry Requirements

There are no formal entry requirements. Computer and internet access required.

SCQF Level

7
