Content

Our Building Services Engineering course considers low carbon building design and the integration of renewable energy systems into buildings. It deals with services engineering issues, building the skills required to cope with the challenges in the working environment. As a conversion course, it gives you a good foundation for launching, or accelerating, a career as a Building Services Engineer – or technical sustainability consultant.

The Building Services Engineering course is flexible and aimed at graduates with engineering degrees or a background in construction. Courses are taught by experts in their fields, making sure that teaching content reflects cutting-edge knowledge in the industry. Our active Industry Advisory panel also includes senior construction professionals from renowned local and global consultants and contractors.

You can exit at the end of Stage 1 with PgDip Building Services Engineering.

Start Date

September, January
