

Information Technology (Business)

Heriot-Watt University

Venues

Edinburgh Campus

Content

Our MSc Information Technology (Business) offers the best set of practical, analytical and theoretical courses for a combined business management and software engineering based training. It covers the design and development of IT systems, the management of IT, business organisation and strategy, project leadership and e-commerce.

Such a strong and unique combination is hard to find and gives our graduates an edge in their pursuit of a research, software requirements engineer, business and IT analytics or IT journalism career.

The programme does not emphasise computer programming but instead seeks to develop graduates who are equipped with excellent analytical and project management skills to help them become the best communicators / managers working between hard-core software developers and business managers.

In some cases, the MSc project can be carried out in collaboration with an outside industrial or academic organisation.

You can exit at the end of 18 months with PgDip Information Technology (Software Systems).

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)

Award Title

MSc

Course Length

24 months

Faculty

School of Mathematical and Computer Sciences
