

Financial Technology

University of Strathclyde

Content

This MSc in Financial Technology (FinTech) teaches the big data techniques, computer programming, and analytics that banks and insurance companies are looking for. Graduates in this field will have a good understanding of the changing nature of finance and how accounting, business information systems, and analytic methods are adapting to the internet as a delivery channel.

The course is provided jointly by the top-ranked Departments of Accounting & Finance and Management Science with input from Computer & Information Science.

The course is 12 months full-time, with two semesters of classes followed by two projects over the summer. You'll gain a comprehensive skill set using a blended learning approach that combines theory, intensive practice and engagement with FinTech start-ups. The course content will involve interaction with the Bloomberg Trading Simulation Laboratory in the Business School.

Start Date

September
