

Advanced Biochemistry

University of Strathclyde

Content

Advanced Biochemistry (MSc) has a special focus on how cells work at molecular level. Together with the related field of molecular biology, biochemistry provides important advances in understanding the molecular basis of life, and how alteration or disruption of these molecular pathways leads to disease processes.

The Masters in Advanced Biochemistry will provide you with comprehensive postgraduate life sciences training. You'll receive dedicated training in a broad range of practical laboratory skills.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Faculty

Faculty of Science

Department

Pharmacy and Biomedical Sciences

Entry Requirements

A first or second-class Honours degree, or overseas equivalent, in a biological or chemical discipline.

SCQF Level

11

Progression Routes
