

Advanced Computer Science with Big Data

University of Strathclyde

Content

The MSc Advanced Computer Science with Big Data gives you the skill set needed in a range of industries. You'll gain an understanding of the new challenges posed by the big data revolution, particularly in relation to its modelling, storage and access.

Big data is of growing importance in businesses and society in general. A skills shortage in this area means companies are willing to pay high salaries for the right skill set (The Guardian Career Choices).

Opportunities for graduates exist in a range of industries such as finance, films and games, pharmaceuticals, health care, consumer products and public services. Our MSc Advanced Computer Science with Big Data gives you the skill set needed.

You'll gain an understanding of the new challenges posed by the big data revolution, particularly in relation to its modelling, storage and access.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Faculty

Faculty of Science

Department

Computer and Information Science

Entry Requirements

Minimum of second class honours degree or international equivalent in computer science or another numerate discipline such as mathematics, physics or engineering.

SCQF Level

11
