

Network Security

Heriot-Watt University

Venues

Edinburgh Campus

Content

The masters in Network Security teaches the theory, methods and tools of computer network security. It'll give you the knowledge to help you keep networks safe from attacks and threats by hostile parties. Plus the skills to formulate policies, deploy network security solutions and validate their effectiveness. The course also offers a detailed understanding of contemporary issues in network security research areas. Our masters in Network Security is ideally suited for honours graduates with an IT background.

You can exit at the end of 21 months with PgDip Network Security.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)
