

Sustainable Urban Management

Heriot-Watt University

Venues

Edinburgh Campus

Content

Over half of the world's population now lives in urban areas and the sustainable development of our cities poses key challenges for urban management. There is a need to deliver sustainability while ensuring managed urban environments can adapt to a changing climate and changing economic and social conditions.

This programme represents a new type of degree, focusing on analysing the issues of, and the tools used to address and deliver, sustainable development across the globe, from the scale of the building right up to the regional and national scale. It is designed to equip urban managers and leaders with an academically rigorous and professionally relevant postgraduate qualification relating to changing global circumstances.

You can exit at the end of Stage 1 with PgDip Sustainable Urban Management.

Start Date

September, January

Qualification

Postgraduate Master's

Study Method

Distance and Flexible learning
Part time (day)

Award Title

MSc
