

Urban and Regional Planning

Heriot-Watt University

Venues

Edinburgh Campus

Content

Planning guides the future development and use of land. It is about where development should happen, where it should not and how it affects the quality of our surroundings. Urban and regional planning strives to design and deliver equitable, inclusive and sustainable communities where people can live, work and enjoy their leisure time. This involves promoting and facilitating development while protecting and enhancing the natural and built environment.

Our Urban and Regional Planning degree is designed to equip you with the knowledge and practical skills needed to work as a professional planner. You will develop the ability to ask the right questions and find creative solutions to the challenges facing communities and the built environment.

You can exit at the end of Stage 1 with PgDip Urban and Regional Planning.
