

Ecological Economics (in conjunction with Scotland's Rural College (SRUC))

University of Edinburgh

Venues

King's Buildings Campus

Content

The MSc in Ecological Economics prepares you to contribute to solving sustainability problems by focusing on the intersection between the environment, the economy, and economic decision-making.

The interdisciplinary nature of the programme links environmental, social and economic systems together, and focuses on the mutual dependences between them. This gives you a unique understanding of the consequences of human economic activity on the planet's limited resources.

You will participate in sustainability problem-solving with an emphasis on practical experience and 'hands on' learning. You will experience training in a wide range of quantitative and qualitative methodologies and the associated data analysis using real world case studies.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)

Award Title

MSc

Course Length

2 - 3 years
