

## Decommissioning

University of Aberdeen

### Venues

Old Aberdeen Campus

### Content

The aim of this programme is to provide students with a broad range of knowledge and expertise in the physical process of taking offshore platforms out of service, including engineering, project management, business, law, health and safety, and environmental studies.

The MSc Decommissioning was designed in collaboration with major operators, supply chain companies and regulatory bodies and features guest lectures from leading decommissioning industry experts. In addition, many students have the opportunity to undertake industry-based projects as part of the programme.

In Semester 1 and Semester 2 you will undertake taught courses, followed by your research project, which you can design with faculty, based on your research interests or industry experience. Some students also have the opportunity to undertake their project with a company or external organisation and benefit from direct industry input and interaction.

Applications are welcome from students from a broad range of educational and industry backgrounds, including engineering, business, law and environmental science and from both recent graduates or experienced professionals who are looking to upskill or move into the growing decommissioning sector.

### Start Date

September, January

### Qualification

Postgraduate Master's

### Study Method

Full time

### Award Title

MSc

### Course Length

12 months

### Faculty

Physical Science

## Department

Engineering

## Entry Requirements

A 2:1 (upper second class) UK Honours degree in Engineering, Geosciences, Economics, Business, Law, or other science, technology and commercial degrees.

Other degree classifications will be considered if the applicant can demonstrate 3+ years of industry experience.

Please note that international applicants for this programme require an Academic Technology Approval Scheme (ATAS) certificate. The ATAS certificate must be obtained before applying for a Tier 4 visa. You can submit an ATAS application up to 6 months before the programme start date, even if the offer is still conditional.
