

Energy Politics and Law

University of Aberdeen

Venues

Old Aberdeen Campus

Content

This programme will provide you with the skills to analyse energy, political, economic and legal issues. You will study the politics of energy and of electricity market reform; how economics and legal issues affect political and commercial decisions in energy; how the law affects the oil and gas industry; commercial domestic and international political regulation of energy markets; the politics and law of renewable energy; international energy security issues such as oil crises and the law and politics of climate change. Being based in Aberdeen, Europe's energy capital, there are greater possibilities for opportunities for direct engagement through work experience or collaboration in writing dissertation projects with the energy industry. This will enable you to more easily to find employment in an energy-related activity.

Start Date

September, January
