

Environmental Management

University of Aberdeen

Venues

Old Aberdeen Campus

Content

This MSc is ideally suited for students looking to gain a greater understanding of environmental science and environmental management. This degree aims to address environmental issues within the local, regional and global context.

Within the programme students will cover courses in environmental pollution, sustainable resource management, environmental management, catchment management and environmental impact assessments. During these courses they will develop key skills in environmental policy, legislation, risk assessment models and writing management plans. The students will gain a wide understanding of landscape science within a context that develops upon empirical details.

These skills will make the graduates ideal candidates for positions in environmental consultancies, regulators and NGOs.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)

Award Title

MSc

Course Length

24 months

Faculty

Life Sciences and Medicine
