

Marine Conservation

University of Aberdeen

Venues

Old Aberdeen Campus

Content

With the increasing variety and scale of human activities that affect marine environments it is vital that we have scientists who are able to take a multidisciplinary approach to understanding, monitoring and regulating impacts on marine biodiversity.

Run in collaboration with key conservation and management bodies, this MSc programme will provide you with an understanding of the issues that are central to marine conservation, and will develop practical skills and analytical ability that you can apply to real-world situations. You will learn from renowned researchers and leading practitioners, and will gain deep insight into a wide range of marine ecosystems in Scotland and internationally.

The programme will suit individuals looking to work in conservation bodies, environmental consultancies, government agencies, or progress to PhD research, as well as professionals who are keen to refocus their knowledge and skills on conservation of marine biodiversity.

Start Date

September, January

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Faculty

Life Sciences and Medicine

Department

Biological Sciences

Entry Requirements

A UK 2:1 honours degree (or international equivalent), in a biological, environmental or physical science, geography, or other relevant subject; applicants with a 2ii (or equivalent), particularly with some relevant experience, may also be considered. We also consider individuals with degrees in a wider range of disciplines who are clearly motivated by the programme and have some relevant experience.

SCQF Level

11
