Content

Technology has always been central to the treatment of patients in orthopaedics and rehabilitation, and the use of technology has never been greater than it is at present. Today you can choose from a large and ever increasing variety of devices.

The Department of Orthopaedic and Trauma Surgery at the University of Dundee is one of the principal training institutions of orthopaedics, biomechanics and rehabilitation technology in the UK.

This programme has been designed and written by experts from centres in Dundee and includes up-to-date material reflecting current knowledge and understanding. The Diploma course comprises four groups of modules and the MSc course comprises the same four module groups and a project. The courses are delivered by distance learning techniques, to suit the needs of today's working professional.
