Content

Science and technology have always been central to the treatment of patients in orthopaedics and rehabilitation, and the use of technology has never been greater than it is at present. Today you can choose from a large and ever increasing variety of devices.

The MSc in Orthopaedic Science programme provides a robust and wide-reaching education in the fundamental physical sciences relating to orthopaedic surgery. It is the only programme amongst the few comparable MSc programmes in the UK with a specific focus on the theoretical and practical application of technology within orthopaedics. Additionally, it equips trainees with the knowledge of fundamental science required for the FRCS exit exam.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Distance and Flexible learning
Part time (day)

Award Title

MSc

Course Length

2 - 5 years

Department

Medicine, Dentistry and Nursing
