

# Design Innovation and Interaction Design

Glasgow School of Art

## Venues

Highlands and Islands Campus

## Content

The relationship between humanity and technology has shaped the world as we experience it, whether these technologies were agricultural, industrial or, as they are today, digital.

The interaction between social, cultural and technological aspects of life defines the study of Interaction Design as a field of enquiry. Interaction is no longer merely a technological phenomenon, rather it is relational; it links every aspect of social life.

People experience their environment and interaction with others mediated through new technologies. Interaction Design considers not only the opportunities that designed products or system provide, but also the space and relationships with the people who are affected.

This course examines the relationship between the technological push for innovation and the societal search for personal equality, quality of life and community wellbeing. Students on this programme will explore how these societal issues are addressed by technological advancement and social innovation within contemporary society.

You can exit after Stage 1 with PgCert Design Innovation and Interaction Design.

You can exit after Stage 2 with PgDip Design Innovation and Interaction Design.

## Start Date

September

## Qualification

Postgraduate Master's

## Study Method

Full time

## Award Title

MDes

## Course Length

12 months

## Department

School of Design

## Entry Requirements

A good Honours degree in a relevant subject. Please visit GSA website for details.

## SCQF Level

11

## Progression Routes

«ProgressionRoutes»

## Combination Courses

«htmlCombinationCourse»
