

## Electrical Engineering (Scottish Power)

Edinburgh College

### Venues

Midlothian Campus

### Content

The course is designed to introduce you to electrical engineering and prepare you for a potential apprenticeship with Scottish Power. The course is based in both the workshop and classroom ensuring you get the combination of practical and technical skills you need for employment as an apprentice electrician.

The course will also prepare you for further study in Electrical Engineering should you wish. As part of the course, you will attend sessions with Scottish Power at their training centre and may be offered a place on their apprentice programme.

### Start Date

August

### Qualification

NC

### Study Method

Full time

### Course Length

18 weeks

### Department

Electrical Engineering

### Entry Requirements

4 subjects at National 4 including English, Maths and a science subject.

### SCQF Level

5

### Progression Routes

Modern Apprenticeship or NC Electrical Engineering (Level 6)
