Product Design (2nd year entry)

University of Dundee

Venues

City Campus

Content

Product Design at Duncan of Jordanstone College of Art and Design will train you to design products that meet the needs of real people. It is an award-winning programme with strong links with industry and a vibrant studio-based culture.

The design process generally starts by undertaking human-centred research to inspire our work. We apply this knowledge to our diverse design skills and technological know-how, to make real and valuable difference in the lives of people.

Our students have the option of studying abroad for an agreed period in their third year with partner universities. Students have studied in Italy, Spain and Canada, among others. We also take overseas students from partner universities onto our course.
