

Agriculture

University of the Highlands and Islands

Venues

Argyll College UHI

Content

The aim of the HND Agriculture is to develop practical and core skills and build competence and understanding in the areas of applied science and technology, business management, economic policy and the environment.

You will gain the skills, knowledge and understanding of animal and crop production technology, farm mechanisation, business management and managing people, which are necessary for a position as a trainee/assistant farm manager or equivalent. You will also develop your awareness of relevant health and safety, animal welfare and environmental issues.
