

Civil Engineering

University of Dundee

Venues

City Campus

Content

Civil Engineering is concerned with harnessing the great powers of nature for our use and convenience. Civil Engineers create, improve and protect the environment, they are involved in overseeing large-scale projects from design through to construction and completion.

We are one of the top Civil Engineering departments in the UK and provide a friendly and informal teaching and learning environment, with a high staff-student ratio and an excellent employment record for our graduates.

Subjects studied include environmental hydraulics, water resources and treatment, design in steel and concrete, computer modelling, soil and rock mechanics, highways and bridges, and building engineering. There is the opportunity to transfer to the more advanced MEng degree if your progress permits.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BEng Hons

UCAS Code

H200

Course Length

4 years

Department

Science and Engineering
