Content

The horticulture industry plays an increasingly important part in the rural economy in Scotland and Moray.

With an increase in demand for skilled workers and expected growth in employment opportunities, there's never been a better time to find employment in this rewarding industry.

This course covers all aspects of the industry from commercial growing to vegetable gardening and is ideal if you have some knowledge of horticultural practices as it will provide you with the opportunity to develop advanced practical skills and extend your understanding and theoretical knowledge.

The course incorporates an SVQ in Horticulture (SCQF Level 5), formerly SVQ Level 2 which is an industry standard qualification that employers look for their staff to have.

Start Date

August

Qualification

Other

Study Method

Full time

Course Length

1 year
