

Medical Imaging

University of Dundee

Venues

City Campus

Content

Develop your skills, knowledge, and understanding of engineering design, medical imaging technologies and the clinical environment whilst learning how to apply, develop, and improve medical imaging and biotechnological products and systems.

You will be trained in electrical, microwave, magnetic, acoustic, and optical techniques relevant to life sciences, along with analytical and imaging techniques relevant for biology, biomolecular, and clinical sciences.

To help you understand biological terminology, you will also receive broad practical training in biology and biomolecular sciences.

Start Date

September, January

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Department

Science and Engineering

Entry Requirements

You should have, or expect to have, a BSc or BEng degree at 2:2 or above (or a suitable equivalent) in a relevant engineering, physical science or medical degree. Applicants with a product or industrial design qualification may also be considered depending on engineering content of their degree qualification.

SCQF Level

11
