Computing and Music

University of Aberdeen

Venues

Old Aberdeen Campus

Content

This degree is a perfect combination for students who have a strong interest in music; perhaps more specifically music production. Understanding key computing courses such as programming will offer students the chance to move in to careers like music production and sound engineering, where strong computing skills will be of benefit.

This programme offers up a range of computing and music courses whilst still delivering some key core courses. In computing, core courses remain in areas of Computer Programming Principles and Computer Architecture, Data Management and Software Engineering, to name a few. Music related choices come in the form of courses such as; Fundamentals of Music Theory, Fundamentals of Music Harmony and Performance.

The Music staff are active as musicologists, composers and performers and their work is recognised and valued throughout the world, both in research communities as well as in the concert hall and via broadcast media.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

MA Hons

UCAS Code

IW13

Course Length

4 years

Faculty

Arts and Social Sciences

Department

Social Science

Entry Requirements

2027 entry requirements:

Standard entry:
4 Highers at BBBB plus English at National 5.

For second year entry you would require Advanced Highers at AB.

Widening access entry:
3 Highers at BBC plus English at National 5.

1 Foundation Apprenticeship is accepted in place of a Higher.

Candidates required to demonstrate a strong interest in the study of music in one or more of a range of disciplines including performance, composition, music technology, musicology, and community engagement. Graded qualifications on instrument or voice are welcome but are not essential. Performance studies will require audition on arrival.
