

Computing with Digital Media (Web and Mobile Applications)

Fife College

Venues

Glenrothes (Stenton) Campus

Content

Mobile applications (apps) have become popular in recent years as ubiquitous computing devices such as smartphones and tablets have become the norm. You can check the weather or the time of the next train, order and pay for goods and services, play games and even check your bank balance using your mobile phone - and this is just the start! Web and software development companies are adapting to these dynamic new technologies and are desperately seeking newly skilled and talented individuals.

This brand new SCQF Level 5 course is an ideal starting point for those seeking a career in this industry and provides a progression pathway to our NC Web and Mobile Applications Development Level 6 course and beyond.

Upon successful completion, you will gain an SCQF Level 5 National Certificate as well as a National Progression Award (NPA) in Mobile Technology at SCQF Level 5.

Start Date

September

Qualification

NC

Study Method

Full time

Course Length

1 year

Department

Computing and Digital Technologies
