

# Computing with Esports

UHI Inverness

## Venues

Inverness Campus

## Content

With the increasing demand for workers to be skilled in cyber and digital technologies, this course provides you with the basic skills to progress in this ever-growing sector. You will learn how to build, upgrade and fault-find on computer systems as well as developing interactive multimedia skills in web and app development. You will have the opportunity to develop basic programming skills and actively organise and promote live esports events.

By undertaking this course, individuals not only acquire technical expertise but also actively engage in projects that mirror real-world scenarios. If you're eager to explore the exciting intersection of computing, web design, and the booming esports industry, join us on this transformative journey where theory meets hands-on experience.
