

Advanced Clinical Practice

University of Aberdeen

Venues

Old Aberdeen Campus

Content

The optimal delivery of modern health care requires a multi-disciplinary team and for members of that team to flexibly perform many tasks previously performed by particular professions and to take on the lead role. The knowledge and skills required of those undertaking such advanced roles have expanded well beyond the traditional clinical specialist skills of their profession to include leadership, clinical education, quality improvement, clinical human factors and an understanding of local and national contexts of health care and working across boundaries.
