

Public Health

Glasgow Caledonian University

Content

Increasing inequalities continue to challenge quality of life and life expectancy improvements across the world. An ageing population, increased chronic disease burden, migration, environmental damage and climate change continue to highlight the need for an international workforce to take forward the public health agenda.

Glasgow Caledonian University's Master of Public Health aims to prevent disease, promote health, and protect the health and well-being of the public through education, research and public health practice and service.

Modules include:

Advanced Research Methods; The Principles and Theory of Public Health Practice; Epidemiology: Principles, Application and Evaluation in Practice; Social Action Approaches in Public Health; Health Economics; Applied Statistics and Data Analysis for Public Health; Master Dissertation.

You can exit after stage 1 with PgCert Public Health
