

Environmental Architecture

Glasgow School of Art

Venues

Main Campus

Content

This programme provides students with specialist knowledge and insight into the relationships between low energy architectural design, energy and indoor environmental performance, and building occupants.

The core content is structured to provide students with an intellectually intense experience in the contemporary issues of theory integrated with the practice of design of sustainable and healthy built environments. Project-based learning and case study models enable students to develop real world learning skills and experience. The dissertation/design thesis at stage 3 provides a vehicle through which candidates will be supported to become masters of their selected subjects of interest.

Start Date

September

Qualification

Postgraduate Master's
