Venues

Foresterhill Campus

Content

The MSc degree in Microbiology will take you through a wide-ranging curriculum describing some of the latest advances in microbiology. It includes courses on microbiology, applied statistics, bioinformatics, regulation of microbial adaptation and host-pathogen interactions in infection and disease.

The MSc Microbiology aims to provide you with: An understanding of the general principles of microbiology; An ability to apply knowledge in academic and health contexts; and Opportunities to learn from world renowned researchers.

This programme is ideal for students and scientists who would like to improve their career prospects, fill skills gaps and further their hands-on microbiology research experience.

Start Date

September, January
