

## Sustainable Water Environments

University of Glasgow

### Venues

Gilmorehill Campus

### Content

The Masters in Sustainable Water Environments will provide you with multidisciplinary knowledge and expertise in river catchment, lake and coastal environments, with a focus on the impact of and adaptation to changing environments. The programme is designed to enable you to develop an in-depth and critical understanding of contemporary global issues in surface water environments including climate and land use change, flood risk, restoration, ecosystem health, and associated management perspectives. The programme is ideal for you if you are keen to pursue a professional career or research in the water environment.

### Start Date

September
