Content

One Health sits at the interface between human, animal and ecosystem health. As such, it is a fast-evolving subject area, well suited to preparing professionals looking to tackle the wide range of intractable and highly complex health challenges of the 21st Century. This programme is suitable for a wide range of professionals, whose disciplinary backgrounds can include the health, biological, environmental and social sciences. This programme is delivered fully online, making the most of the University's pioneering, award-winning online learning environments.

The One Health programme is part of the Global Health Academy and we share many elective courses with other programmes in the Academy. This provides a great deal of flexibility allowing you to personalise your studies to reflect your professional interests and career aspirations. As well as learning from the expert tutors you will join with students from around the world on a number of different master's programmes to share experiences and knowledge.

You can exit after 1-2 years with PgCert One Health.

You can exit after 2-4 years with PgDip One Health.

You can exit after 2 years with PgProfDev One Health.
