

Introduction to the Automotive Environment (Level 4)

West Lothian College

Content

This course is an introduction to the automotive industry which is delivered over 18 weeks. The course provides an excellent introduction to a career in automotive engineering, teaching you the practical skills needed to progress to further study in the area.

You will develop practical skills in a motor vehicle workshop environment, and although most of the time will be spent on practical activities, you will also learn the principles in the classroom.

Units include:

Engine lubrication and cooling; Fuel and exhaust systems; Electrical systems; Braking systems; Steering and suspension; Wheels and tyres; General vehicle mechanics.
