

Digital Design and Development

Dundee and Angus College

Venues

Gardyne Campus

Content

This full-time industry-recognised course builds on the HNC Digital Design & Web Development course. The main focus is acquiring the technical skills to build interactive websites with back-end database systems. Learners have the opportunity to put theory into practice by working on individual and team-based client projects, which will further develop their creative and technical skills. This course is delivered on campus and includes classes, practical tutorials, project work, and self-study sessions.

Start Date

August
